DETAILED ACTION

1. The following is an examiner's statement of reasons for allowance:

Applicant's amendment filed on 8/17/04 has been fully considered and they are persuasive.

Referring to new claim 1, the applicant argues that neither Greenway et al nor Gove et al nor Anderson et al discloses a number of substantially identical processing units that are configured to work in parallel and define a VLIW vector processing assembly. The examiner agrees.

The prior art does not teach or fairly suggest that when considering a hand-held digital camera that comprises an image sensor, a reader, a number of substantially identical processing units that are configured to work in parallel and are configured to define a VLIW vector processing assembly, a crossbar switch and a printer.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
